

Assessment of CET Group Ltd's Drain Repair procedures - schedule

independent certification of your products & services

1. Scope

To assess procedures used by CET Group Ltd for the investigation and repair of drains.

The CET Group carries out CCTV surveys and reports on drainage system condition recommends remediation options. The Group offers excavation and replacement, and lining repair solutions. Repair teams are based at offices in Kegworth and West Drayton.

The scope of the assessment is limited to compliance of CET Group's procedures with the requirements of The Drain Repair Book: Second Edition⁽¹⁾.

One cured-in-place pipe lining technique is included by CET for assessment. It is referred to as the CET Polyester System and the materials used are:

- Gadmon Ultraflex carrier tube, length 6 metres, 4.5 mm wall thickness;
- Gadres 3000 resin, 10.8 litres;
- Gadcat 40 catalyst (3%), 324 ml.

Note: Only those methods and materials that are assessed and shown to conform to the Drain Repair Book can subsequently be used under this approval.

2. Assessment schedule

2.1 Review procedures for compliance with The Drain Repair Book.

2.2 Select and review recent projects at each of the two sites (Kegworth,

West Drayton) to demonstrate the practical application of the procedures.

3. Review of procedures

3.1 All procedures included in The Drain Repair Book are to be reviewed, including but not limited to:

- claims handling and reporting;
- site investigation methods (including data gathering, cleaning, leakage testing, inspection);
- scoping repair work (including condition grading, serviceability, the need for repair and likely causes)
- selecting repair technique;
- specification of site work (including method statements);
- specification of materials.

4. Review of materials

4.1 All materials to be used in replacement or repair are to comply with the requirements of Part 3.

5. Reference documents
